

**Bionic 880 / Bionic Health Care
photon therapy/treatment
provides relief in a natural way.**

Body and soul are smoothly
rebalanced by the Bionic photon
therapy.

The immune system is strengthened,
hormones are harmonized and cell
regeneration is activated.

A relaxed sense of well being is
evoked by stimulating the so called
'happiness-hormones', Serotonin
and endorphins.

An immediate and long lasting anti-
stress effect is induced. This state of
being is immensely helpful when
planning to eat less.

Your health is your greatest asset.

Your therapist will gladly inform you
about adjustment to balanced diet
and physical training.

**Bionic 880 / Bionic Health Care
will reduce your appetite naturally
and you will feel well with it.**

**Bionic 880 /
Bionic Health Care
- the easy way
to wishful
weight**

Why overweight?

Today's nutrition and sedentary lifestyle, as well as frustrations and stress effects cause a dysbalance of normal weight to many people.

Critical situations and struggle for life can lead to hunger pangs. Opening the fridge seems to be the solution for the hunger trouble.

Desire for sweets, malnutrition, too fast intake of food caused by stress or lack of physical activity may cause an unintended gradual increase of weight, too.

As diets do not always show the desired effect, increasingly often artificial appetite suppressants are taken.

Bionic 880 / Bionic Health Care - the new solution for natural weight control by photon treatment.

When leading a wholesome life, the feelings of hunger and repletion are influenced and regulated by the Serotonin hormone.

Unhealthy living causes disturbances of the body's own Serotonin production. This leads to uncontrolled eating habits, which result in a gain in weight.

By the **Bionic 880 / Bionic Health Care** treatment a specific energy is administered to the body stimulating its own regular Serotonin production.

The result is a positive influence on appetite regulation and feeling of repletion. By the **Bionic 880 / Bionic Health Care** treatment a natural appetite suppressant is activated.

Further effects of the treatment are brightening of the mood, relaxation and an increase of motivation, which allow an easy introduction of more wholesome nutrition and an increase of physical activity.

To eat less and feel well with it is the precondition for achieving one's wishful weight.
